Dear FCC I am a very satisfied and enthusiastic member of the XM satellite radio community. I thoroughly enjoy the diverse programming that I am exposed to and able to listen to as a subscriber to satellite radio. It is a valuable alternative to the repetitive and mundane programming that is all that is offered on airwave radio. I live in a rural area and the broadcast radio that I am exposed to is very limited. Satellite radio is a very highly enjoyed and overdue breath of fresh air! I am adamantly opposed to any measure that would limit the ability of satellite radio to continue offering the diverse programming that it offers. I urge "you" as a representative of me and all those who enjoy satellite radio to reject the NAB's petition 04-160
